## CAREER OBJECTIVE

Computer Science undergraduate with a strong foundation in software development and applied machine learning, experienced in translating real-world problems into structured, efficient solutions. Seeking a challenging role to apply analytical thinking, technical proficiency, and project experience toward building reliable and scalable systems. Driven by a commitment to continuous improvement, disciplined execution, and meaningful contribution within a professional environment.

## EDUCATION

**KIIT University, Bhubaneswar**

*Bachelors of Technology*

Sept 22' - May 26'

**CGPA: 9.15**

**ODM Public School, Bhubaneswar**

*Senior Secondary*

2022

**95.6%**

**Loyola School, Bhubaneswar**

*Lower Secondary*

2020

**93.4%**

## TECHNICAL SKILLS

- **Languages:** Java, C#, TypeScript, SQL
- **Web Technologies:** HTML, CSS, Angular, REST APIs
- **Backend Frameworks & Databases:** Entity Framework, ASP.NET, MySQL, MongoDB
- **Tools & Platforms:** Visual Studio, Azure Devops, Docker, Git, Postman, VS Code

## EXPERIENCE

**AI/ML Intern - DJT Corporation and Investments PVT LTD, Noida**

(May 2025 - July 2025)

- Developed & deployed a live face-recognition-based attendance system to automate attendance marking.
- Utilized Python, OpenCV, FaceNet, and Machine Learning models for real-time face detection and recognition.
- Built and deployed REST APIs using FastAPI for seamless integration of the attendance system.
- Implemented MongoDB for storing face embeddings and attendance records. Enhanced efficiency by eliminating manual errors, ensuring fast, contactless, and accurate attendance tracking.

**Winter Intern - Infosys**

(December 2025 - May 2026)

- Selected for the Winter Internship Program from a national applicant pool, with 650 students chosen for the cohort.
- Successfully completed a 90-day intensive training program focused on C# .NET Full-Stack Development.
- Gained hands-on experience with Angular for frontend development and ASP.NET Core for backend development using Entity Framework.
- Developed practical expertise in RESTful API design, database integration, and end-to-end application development workflows.

## PROJECTS

### Smart Grocery List and Budget Planner

- Developed a full-stack web application to streamline grocery management by automating list generation based on user consumption patterns.
- Implemented features for monthly budget planning, expense tracking, and real-time spending insights through an interactive dashboard.
- Built RESTful APIs using ASP.NET Core and integrated them with an Angular frontend for seamless user experience.
- Utilized Entity Framework and Microsoft SQL Server for efficient data handling, including user data, grocery lists, and expense records.
- Designed and integrated additional functionalities such as recipe suggestions and price tracking (mock data) to enhance usability and decision-making.
